Embarking on a Thrilling Journey - The AMIU Hackathon

We are thrilled to announce that our very first AMIU Hackathon is underway, and it's set to be an exhilarating ride.

As of Tuesday, September, we've welcomed a diverse and dynamic group of participants. With 150 university students and 30 innovative healthcare startups, our hackathon promises to be a melting pot of knowledge, creativity, and expertise. To all the selected applicants, congratulations on securing your spot in this groundbreaking event!

From September 25th, you will be immersed in the captivating world of "Intersection of AI, Climate Change and PHC" with a mission to develop cutting-edge solutions that address the pressing challenges at this convergence.

But you won't be on this journey alone. Each team will be privileged to work closely with dedicated mentors who will help shape their ideas into tangible solutions. To equip them for success, both our participants and mentors will receive specialized training, exploring the transformative AI solutions pioneered by the AmIU Health Entrepreneurship team.

As we look ahead to the grand finale, we can't help but get excited about the incredible awards awaiting the emerging champions:
·
AI-Driven Solutions:
A platform to revolutionize Primary Healthcare (PHC) challenges linked to climate change.
·
Innovation Support:
Seed capital and technical assistance to supercharge and scale the three most innovative solutions.
·
Building an Ecosystem:
Creating a collaborative ecosystem that bridges industry pioneers and higher education institutions. Together, we'll combat the effects of climate change on PHC.

We're committed to making this hackathon an enjoyable and enriching experience for everyone involved. Stay tuned for more updates as we embark on this remarkable journey together!
